

Imaging & Mathematics

networking across disciplines

First Network Meeting

Thursday 5th December 2019

3 - 4:30pm (with tea & cake)

Cancer Research UK Cambridge Institute
Lecture Theatre, Robinson Way, CB2 0RE

Ali Dariush, PhD

Ziqiang Huang, PhD

Medical and Bio-Image Analysis: Tools & Methods

The advancement of imaging technologies over the past decade, has brought new computational challenges in order to deal with a large volume or complex forms of imaging data. During these talks, both speakers will review tools and useful methods to analyse and process such digital images (research & medical). They will introduce some of the well known commercial / open-source software and try to go through pros and cons associated with each approach.
